

2015.02.19 Quality of Netcad's Solutions are Appraised Once Again

Quality of Netcad's Solutions are Appraised Once Again

February, 19 2015

Netcad Yazılım A.Ş., one of the biggest software firms of Turkey developing Engineering and Geographic Information Systems solutions, has completed CMMI (Capability Maturity Model Integration) DEV 1.3 survey successfully. Hereby, Netcad's CMMI Appraisal for its software and development activities has been revalidated till 2018.

CMMI DEV / 3SM
Exp. 2018-01-20 / Appraisal #23698

The works conducted by Netcad, at the level of CMMI 3th model, initially in software and Research & Development departments have been reevaluated.

Ufuk BALCI, General Director of Netcad, commented that through CMMI appraisal, the competence of Netcad's administration are proven once again. BALCI, has emphasized that this appraisal would contribute Netcad to fulfil its goals and competitive power as it always has been.

About CMMI

CMMI is a Process Model Framework for process-improvement developed by Software Engineering Institute (SEI), Carnegie Mellon University (CMU), Pittsburgh, USA. CMMI, standing for Capability Maturity Model Integration, is a structured and systematic collection of best practices for process-improvement. CMMI Appraisals, recognized internationally, are used as a model of process improving by the sectors performed especially in complex project developments currently.

CMMI is generally applied as a reference model especially in software development by IT sector in Turkey and worldwide. Through its capability of being applied in the fields of hardware and network, CMMI is a model in demand for R&D and product development as well. CMMI Appraisal assures the firms, performed in the fields of R&D and product development, to meet all the needs.
